

ERP-adapter

published on 11.01.2018

Fully integrated within SAP, the BNP Paribas ISO XML ADAPTER extracts payment information from your Accounts Payable System and eliminates the need for specialised development resources.

Description

Fully integrated within SAP, the BNP Paribas ISO XML ADAPTER extracts payment information from your account payable system and eliminates the need for specialised development resources. The solution generates instantaneously a template based on ISO 20022 standard into the SAP library. Simply link this new created template to your vendors' payment method and the next payment run (F110) will take it into account.

Benefits

Simplified process: instead of using resources to develop the right format, BNP Paribas brings you an already pre-configured template which can be directly downloaded into your SAP system.

Substantial savings: from 30% for experienced teams, up to far more for teams who have never created payment formats. Because the BNP Paribas ERP ADAPTER is pre-configured, the testing time between your company and BNP Paribas is reduced.

Specifications

Plug and play and non-intrusive solution, the Adapter fits perfectly with your SAP ECC6 environment and does not require any additional modules.

Our SAP consultants will support your team during all the implementation phase.
